We released "DarkNight", a new fixed width (optimized for screenresolutions of 1024x768 or more) commercial template for Joomla 1.5.x. It is a clean but colorful, elegant and fast loading multi purpose template. Made for a width range of webprojects, like product sites, company homepages, web apps and much more. The package includes the templates installation files, the Photoshop source files and a small documentation.

## Template Features

- xhtml 1.0 and CSS 2.0 valid code
- Joomla 1.5 native version
- no tables used
  
- Suckerfish drop down menu build in
- Fully layered and sliced Photoshop source included
  
- lightweight and fast loading
- Build in "Slider" Area for up to 12 modulepositions
- Comes with 7 sub themes to change the look&feel with one click
- CSS3 mode available
