We released "Rickr II", a remake of our best selling Joomla 1.0 template in 2006, called "Rickr". The new "Rickr II" is a commercial template for Joomla 1.5.x. It is a clean and elegant and fast loading multi purpose template. Made for a width range of webprojects, like product sites, company homepages, web apps and much more.

The package includes the templates installation files, the Photoshop source files and a small documentation.

Template Features

- xhtml 1.0 and CSS 2.0 valid code
- Joomla 1.5 native version
- no tables used

- Suckerfish drop down menu build in
- Fully layered and sliced Photoshop source included

- lightweight and fast loading
- Build in "Slider" Area for up to 12 modulepositions
