# Joomla 1.5 Template: "SandMan"

Contributed by Holger  
Thursday, 17 June 2010

We released "SandMan", a new fixed width (optimized for screenresolutions of 1024x768 or more) commercial template for Joomla 1.5.x. It is a bright, clean, modern and fast loading multi purpose template for company websites, product homepages and others.

The package includes the templates installation files, the Photoshop source files and a small documentation.

## Template Features

- xhtml 1.0 and CSS 2.0 valid code, optional with CSS3 effects
- Joomla 1.5 native version
- no tables used
- Suckerfish drop down menu build in
- Fully layered and sliced Photoshop source included
- lightweight and fast loading
- Build in "Slider" Area for up to 12 modulepositions
